The survivors !

Patricia SERRE, Data quality manager, AP-HP (leader)

Audrey MOUNGNY, data scientist, AP-HP (presenter)

Dr Marc WYSOCKI, MD, Product Manager, GE Healthcare Digital

Dr Christel DANIEL, MD, Medical informatics, AP-HP

Thanks to:

Dr Jonas POCHARD, intensivist, biostatistician, AP-HP

Kankoe SALLAH, data scientist, AP-HP

Thanks to their efforts yesterday!

Problem we solved / (tried to!)

- **Characterizing the MIMIC data and its quality**
 - ▶ What does the MIMIC data look like ? (characterization)
 - ▶ What is the quality of the data? (data quality assessment)
 - *Can we define quality indicators for strategic data*
 - ▶ How to report on data quality (visualization)
 - *User friendly diagrams*

What does the MIMIC data look like ?

46480
patients

57790
admissions

main diagnosis by admission type

MALE FEMALE

What does the MIMIC data look like ?

Top 20 procedures

Compliance

- ▶ Impossible negative values – e.g intracranial pressure

No matching concept	497k	60.9%
Base excess of blood	198k	24.2%
Level of arousal	107k	13.1%
Urine output	6.22k	0.762%
Central venous pressure (CVP)	4.15k	0.509%
Intracranial pressure	2.61k	0.320%
Mean blood pressure	1.24k	0.152%
Pulmonary artery Diastolic blood pressure	45.0	0.00552%
Pulmonary artery Mean blood pressure	37.0	0.00454%

400 mesures < -10

- ▶ **44 374** date of birth > 2018

Completeness

- 178694 visit detail occurrence without related visit occurrence ID (required field)

What is the quality of the data? (data quality assessment)

Plausibility

How many females with prostate cancer ?/males with uterus cancer?

Plausibility

- **How patients with pulmonary embolism & without heparine?**
 - ▶ Pulmonary embolism : n= 831
 - ▶ Septic pulmonary embolism : n= 40
- **How many patients with ARDS without mechanical ventilation?**
- **How many patients with cardiac arrest & without epinephrine/norepinephrine?**

How to report on data quality(visualization)

PHDSI_Sample_Database

Observations

Observation Prevalence

Treemap Table

Box Size: Prevalence, Color: Records per Person (Blue to Orange = Low to High). Use Ctrl-Click to Zoom, Alt-Click to Reset Zoom

Observation Periods per Person

Heatmap

■ How to define the plausibility of the data

- ▶ “to what extent the data is medically credible”

■ Database certification : comparing data quality scores

- ▶ **OMOP-based MIMIC** /MIMIC
- ▶ **OMOP-based MIMIC** /other OMOP-based DB of the OHDSI research network
- ▶ **OMOP-based AP-HP DB** /other OMOP-based DB of the OHDSI research network
